IN THE CLAIMS

Please amend the claims as follows.

1. (Original) A digital audio playback device (DAPD) comprising:
an external interface capable of being coupled to a connected processing system, said connected processing system capable of executing a user interface application program that accesses and controls said digital audio playback device via said external interface;
a memory coupled to said external interface capable of storing a reverse DAPD application programming interface (API); and
a processor coupled to said memory and said external interface and capable of executing said reverse DAPD API, said reverse DAPD API capable of causing said processor to access and control a user interface associated with said user interface application program and displayed on a monitor screen associated with said connected processing system.
2. (Original) The digital audio playback device as set forth in Claim 1 wherein said reverse DAPD API comprises executable instructions capable of communicating with and controlling an operation of said user interface application program.
3. (Currently Amended) The digital audio playback device as set forth in Claim 1 wherein said reverse DAPD API comprises [[first]] data associated with a manufacturer of said digital audio playback device.

DOCKET NO.: US 000013
SERIAL NO. 09/691,334
PATENT

4. (Currently Amended) The digital audio playback device as set forth in Claim 3 wherein said reverse DAPD API is capable of causing said processor to access and control at least a portion of said user interface to display said [[first]] data in said at least a portion of said user interface displayed on said monitor screen.

5. (Currently Amended) The digital audio playback device as set forth in Claim 4 wherein said [[first]] data comprises a graphics file comprising a logo image associated with said manufacturer.

6. (Currently Amended) The digital audio playback device as set forth in Claim 4 wherein said [[first]] data comprises a Universal Resource Locator (URL) associated with an Internet web site associated with said manufacturer.

DOCKET NO.: US 000013
SERIAL NO. 09/691,334
PATENT

7. (Original) A processing system comprising:

an external interface capable of being coupled to a connected digital audio playback device, said connected digital audio playback device capable of playing audio files stored in said digital audio playback device;

a memory coupled to said external interface capable of storing a user interface application program that accesses and controls said digital audio playback device via said external interface and capable of storing a reverse DAPD application programming interface (API); and

a processor coupled to said memory and said external interface and capable of executing said user interface application program and said reverse DAPD API, said reverse DAPD API capable of communicating with said digital audio playback device and enabling said digital audio playback device to access and control a user interface associated with said user interface application program and displayed on a monitor screen associated with said processing system.

8. (Original) The processing system as set forth in Claim 7 wherein said reverse DAPD API comprises executable instructions capable of communicating with and controlling an operation of said user interface application program.

9. (Currently Amended) The processing system as set forth in Claim 7 wherein said reverse DAPD API comprises [[first]] data associated with a manufacturer of said digital audio playback device.

DOCKET NO.: US 000013

SERIAL NO. 09/691,334

PATENT

10. (Currently Amended) The processing system as set forth in Claim 9 wherein said reverse DAPD API is capable of enabling said digital audio playback device to access and control at least a portion of said user interface to display said [[first]] data in said at least a portion of said user interface displayed on said monitor screen.

11. (Currently Amended) The processing system as set forth in Claim 10 wherein said [[first]] data comprises a graphics file comprising a logo image associated with said manufacturer.

12. (Currently Amended) The processing system as set forth in Claim 10 wherein said [[first]] data comprises a Universal Resource Locator (URL) associated with an Internet web site associated with said manufacturer.

DOCKET NO.: US 000013

SERIAL NO. 09/691,334

PATENT

13. (Original) For use in association with a digital audio playback device (DAPD) and a processing system capable of being connected to the digital audio playback device, a method of displaying information on a monitor screen of the connected processing system, the method comprising the steps of:

executing in the connected processing system a user interface application program that accesses and controls the digital audio playback device; and

executing a reverse DAPD application programming interface (API), wherein the step of executing the reverse DAPD API enables the digital audio playback device to access and control a user interface associated with the user interface application program and displayed on a monitor screen associated with the connected processing system.

14. (Original) The method as set forth in Claim 13 wherein the reverse DAPD API comprises executable instructions capable of communicating with and controlling an operation of the user interface application program.

15. (Currently Amended) The method as set forth in Claim 13 wherein the reverse DAPD API comprises [[first]] data associated with a manufacturer of the digital audio playback device.

DOCKET NO.: US 000013
SERIAL NO. 09/691,334
PATENT

16. (Original) The method as set forth in Claim 15 wherein the step of executing the reverse DAPD API comprises the substep of accessing and controlling at least a portion of the user interface displayed on the monitor screen.

17. (Currently Amended) The method as set forth in Claim 16 wherein the step of executing the reverse DAPD API comprises the substep of displaying the [[first]] data in the at least a portion of the user interface.

18. (Currently Amended) The method as set forth in Claim 17 wherein the [[first]] data comprises a graphics file comprising a logo image associated with the manufacturer.

19. (Currently Amended) The method as set forth in Claim 17 wherein the [[first]] data comprises a Universal Resource Locator (URL) associated with an Internet web site associated with the manufacturer.

SERIAL NO. 09/691,334

PATENT

20. (Original) For use in association with a digital audio playback device (DAPD) and a processing system capable of being connected to the digital audio playback device, computer-executable instructions stored on a removable storage medium readable by said processing system, the computer-executable instructions comprising a method of displaying information on a monitor screen of the connected processing system, the method comprising the steps of:

executing in the connected processing system a user interface application program that accesses and controls the digital audio playback device; and

executing a reverse DAPD application programming interface (API), wherein the step of executing the reverse DAPD API enables the digital audio playback device to access and control a user interface associated with the user interface application program and displayed on a monitor screen associated with the connected processing system.

21. (Original) The computer-executable instructions stored on a removable storage medium as set forth in Claim 20 wherein the reverse DAPD API comprises executable instructions capable of communicating with and controlling an operation of the user interface application program.

22. (Currently Amended) The computer-executable instructions stored on a removable storage medium as set forth in Claim 20 wherein the reverse DAPD API comprises [[first]] data associated with a manufacturer of the digital audio playback device.

DOCKET NO.: US 000013**SERIAL NO. 09/691,334****PATENT**

23. (Original) The computer-executable instructions stored on a removable storage medium as set forth in Claim 22 wherein the step of executing the reverse DAPD API comprises the substep of accessing and controlling at least a portion of the user interface displayed on the monitor screen.

24. (Currently Amended) The computer-executable instructions stored on a removable storage medium as set forth in Claim 23 wherein the step of executing the reverse DAPD API comprises the substep of displaying the [[first]] data in the at least a portion of the user interface.
